forwarded with compliments to the Senior surgeon for favour of remarks.

By order

H. H. C. Sn Rajagopalachar

for General Secretary

C 106
4-12-1936.

I wish to invite the attention of Govt. to the following points:-

1) Pasteurized milk has a flat taste, which is not liked by the Indian patients. In order to remedy this defect, I learn that in the Krishnarajendra Hospital, the pasteurized milk is just brought to the boil for a short time. This, I venture to submit, annuls the very advantage of pasteurization.

NOTE—Contn. Sheet.

WD 0417--GPB—30,000—8-9-36

Re. Supply of milk to the Hospls at Bangalore.

Med File No. 96 of 193 6 | General and Revenue Secretariat

Serial No.

2) The City Milk Supply Company has quoted 10 pints per Rupee for pasteurized milk, whereas its proprietor Mr. M.V. Krishna Swamy has quoted 9 pints for milk drawn on the premises. This is rather curious, as pasteurization costs something, and pasteurized milk ought to be more costly than raw milk.

3) The City Milk Supply Company draws its supply from the many villages in the neighbourhood of Bangalore, the actual milking being supervised by their clerks, and one has to depend eventually on the honesty of these clerks for ensuring the purity of the milk.

4) The total cost per annum works out to Rs 36,100 for pasteurized milk at 10 pints, and to Rs 31,391 at 11½ pints quoted by the Co-operative Society, a difference of Rs 4,709. If pasteurized milk is taken, I am afraid the allotment under diets may have to be supplemented by an additional grant.

Re: supply of milk to the Hospitals at Bangalore

(7)

General and Revenue Secretariat — Med File No. 96 of 1936 — [App. F. III—2

Serial No.

5) The Registrar of Co-operative Societies and his two assistants had a personal discussion with me and they are very keen about encouraging the many gwalias who are members of the Ramashram Society, and who can bring their cows to the Victoria Hospital for milking, as they live not far away from the Hospital. The Registrar feels quite sure that the scheme will work quite well, and that it is possible for them to supply at 11½ pints per rupee.

6) The only advantage in getting pasteurized milk seems to me to be that it does not require supervision. This is a doubtful advantage.

Under the circumstances, I think we may give the Contract to the Ramashram Society and try it for six months. The Registrar requests for an early decision, as he has to arrange for the supply before the End of this month.

FROM

SASTRAVAIDYA PRAVINA

S. SUBBA RAO, ESQ., B.A., M.B.C.M., M.R.C.S. (Eng.), L.R.C.P., D.P.H.,

Senior Surgeon with the Government of H. H. the Maharaja of Mysore.

To The General Secretary to the Government of 11/12
His Highness the Maharaja of Mysore, Bangalore.

Sir,

In continuation of my U.O.Note No.C.106 dated 5-12-1936, I have the honour to forward herewith a copy of a D.O.letter received this day from the Registrar of Co-operative Societies confirming the assurance previously given that the quantity of cows' milk required by the three Government Hospitals can be supplied by the members of the Kamadhenu Society. He adds that three of the present tenderers are members of the Society. As certain preliminary arrangements inclusive of taking agreements purchasing additional cows &c., have to be effected, he requests that the orders of Government be communicated to him before the 15th Instant.

I request the favour of very early orders.

I have the honour to be,
Sir,
Your most obedient servant,

S. Subba Rao

Senior Surgeon.

D.O.Letter No. 259 dated 11-12-1936, from the Registrar of Co-operative Societies in Mysore, Bangalore, to the Senior Surgeon in Mysore, Bangalore.

I met the members of the Kamadhenu Co-operative Society yesterday again at an informal meeting and I am in a position to assure you that the quantity of cows' milk required by the three Government Hospitals in the Bangalore City can be supplied by them. Agreements are being taken from the members for the supply to be made by each of them and adequate security deposits will also be obtained. As the members want an early confirmation of the contract being given to the Society in order to break off their present engagements and also in order to purchase additional cows, I request you to kindly give me definite information about it by the 15th of this month if possible. Most of these milkmen have, I learn, already been supplying the Hospitals through the contractors. I need not tell you that by securing the contract to the Society a large number of these poor men will be benefited without one rich middleman intercepting and pocketing those profits.

I may also inform you that among the list of tenderers, that you sent with your D.O.letter No.G.C.92-4 dated 26th November 1936, three are members of the Kamadhenu Society

P.T.O.

Society and are prepared to supply milk through the Society. Sufficient safeguards will also be adopted for ensuring the quality and purity of the milk.

"Copy".

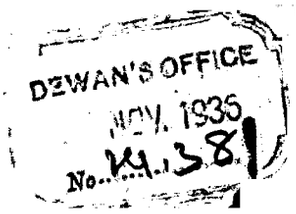
Subject APPEAL REGARDING SUPPLY OF MILK TO THE HOSPITALS IN BANGALORE.



The Private Secretary
to The Dewan Saheb,
Bangalore.

Dear Sir,

We are enclosing herewith for the information of The Dewan Saheb our suggestions for working of supplies at Bangalore for the coming year. We have as per the very kind orders of the Dewan Saheb taken up the supply of Milk to the Hospitals in Bangalore and worked it to the satisfaction of the Hospital Authorities though we have met with a huge loss on the transaction.

We have put our difficulties and have also given our suggestions for improving efficiency, regularity and the quality.

For your kind information, the advantages of adopting the above system may briefly be stated as folows:-

1. The practice of keeping the cows for the sake of milking at the Hospital compound in the congested areas will indirectly be discouraged and the sanitation of those localities will improve.

2. The production in the City which is short for the demand may be increased if sources from outside are organised for a regular supply and worked in the system as is being adopted in Western Creameries.

Subd. for perusal. May be issued as Gen. Sec. for disposal
CE
10/11

MD
10-11-36

Gen. Sec. with compliments
P.S.O.
P.S.O.
10/11/36

Medical Secretary - Please papers pertaining to this

3. The impetus that will be given for the owners of cattle in village area by creating a demand for their milk and milk products will bring with it a desire on the part of the ryot to improve his cattle for milk production.

Lastly but not the least if a supply of this kind ~~worked~~ can be entrusted to an Institute of this kind worked on our principles, responsibility as to quality and safety can be demanded.

In this connection, it will not be out of place to give you a brief survey of this year's supply.

We have been entrusted with the supply to the three hospitals from January 1936 at a very low rate. We took up the supply to see for ourselves how it was possible to supply the Milk at this rate and to meet the working expenses. We found that the price of milk was nowhere near the tendered price and much more so as to give a quality as demanded by us from milkmen. Having taken up the supply we have done our best and inspite of very heavy losses incured, we have only been able to carry on by fresh investment to meet the deficiency during the current Year, so as to bring it to successful finish to the satisfaction of all concerened, only with the hope we would be treated much better next Year.

The causes of the loss in this contract has been the following:-

1. The price of the milk in the City being very much above the tendered rate.

2. The abhorance of the present Contractor to adopt questionable methods to make any profits.

3. The position of the Contractor in the hands of the milkmen of one locality giving them a feeling of being indispensible keeps the Contractor at their mercy and which also necessitates allowing them to have their own way in the matter of the time of bringing cows for milking and delays issues of diets at the Hospital kitchen.

We have therefore proposed that to put the supply on a more safer basis that adoption of supplies from cold-store approved by

test may be

test may be approved so that it may bring convenience and safety to one and all.

We note that though we have represented all the above facts to the authorities, tenders have been called for supply of milk by milking cows in the hospital compound.

We trust the Dewan Saheb will after due consultation and taking into consideration the suggestions and difficulties be pleased to accord sanction for supply of pasteurised milk to the Bangalore Hospitals also as is being done at Mysore, where there has been entire satisfaction.

Begging to be excused for the intrusion on the very valuable time of the Dewan Saheb, and assuring you of our best attention at all times.

We beg to remain,
Yours faithfully,
For THE CITY MILK SUPPLY

Subject.....

Dr. Subba Rao,
Senior Surgeon to
the Government of Mysore
B a n g a l o r e.

Dear Sir,

With the time approaching for the calling of Tenders for the supply of milk for the comming year, we beg leave to approach you to suggest acceptance of pasteurised milk for supply to the hospitals in Bangalore.

In this connection we might mention that in our taking up the contract for supplies this year we have incured a huge loss in spi spite of which we are keeping up the supply to the entire satisfaction of the hospitals.

The reasons for the loss may be stated as follows:-

1) The price of milk in the City being costlier than what has been tendered for.

2) The position of the contractor in the hands of the milkmen community who will not allow any margin when they know that they are quite indispensible.

3) The abhorrence of the contractor to adopt other methods to make it pay without any scruples as to quality etc.,

4) You are also aware that we have successfully met the emergency of various other intrested parties during the begining as we had previously equiped ourselves for that

that

situation and we might mention that it is our equipment and previous experience that has held us up during the year.

In this connection we might also point out that we are successfully supplying all your hospitals in Mysore to their entire satisfaction and it has only been possible by adopting the Western methods of milk supply Viz., Cooling and Pasteurising before delivery.

This method has enabled us to offer a service which has been very helpful in the issue of Diets to the hospital in time and saving a lot of labour in supervising of milking etc.,.

With the introduction of central kitchen in the hospitals in Bangalore the question of time is getting all the more important as all the milk required will have to be delivered in one lot.

Again the variations in the demand of the hospital has been so great that we find, we have to milk a lot more animals than is actually required.

Lastly but not the least we mention that the institution is being managed and supervised by a qualified and educated man whose sole aim has been to successfully put to practice the profession he has learnd and also take the full benifit of advise he has received by comming in contact with educated qualified medical people he has come in contact with.

We sincerely trust you will give us a chance to be of service to you as suggested above instead of the ordinary method of the itinerant milkmen.

Thanking you for a consideration of the above proposal before calling in for Tenders for the comming Year.

Yours faithfully

(Sd) M.V.Krishnaswami.

Bangalore.

COPY OF LETTER NO DATED

FROM THE CITY MILK SUPPLY TO THE MEDICAL OFFICER?, VANIVILAS HOSPITAL? BANGALORE.

Dear Madam,

I am writing these few lines to aquaint you with the present position of the milk supply entrusted to me for the year and also laying before you certain suggestions for the coming year for offering you more better service for future years, in case you should be pleased to entrust me with the supplies of your Hospitals.

THE PRESENT POSITION.

The rates tendered for supply of milk has, during all these years, been offered at a ridiculously low rates which brought with it objectionable practices which you have rightly been striving to stamp out. During the current year I wanted to find out how it was possible for any body to continuously take up a supply at those rates and I now regret to say that I have found it absolutely impossible to supply this quality milk at the rate tendered unless I do face the loss which I am incurring now. I am only carrying on in face of these difficulties and losses as I am hope to make the Hospitals and Government understand the exact position of the system of buying milk for such important institutions and also to show you the ~~advisability~~ inadvisability of accepting such low rates at the cost of quality and the introduction of objectionable practices. This year, on account of the terms of the contract, I have had to agree to the terms dictated by the Milkmen of one locality who have brought me at their mercy and a feeling that they are quite indispensible. If a contractor is to be placed in such a position in regard to supply of such a commodity as milk, it is certainly dangerous as the regularity of supply is at stake. This is an article of food which cannot be readily procured and can only be supplied with previous notice and also only at certain times of the day. This is a perishable product and

and must all the more be better handled than what it is now.

If, this year, I should have supplied the demands of the Hospitals with wide variations and kept up the quality, it has only been possible by my being able to meet the very heavy losses by fresh investment in the trade in the hope of better patronage for the coming year.

Refering to the present practice, I bring in about 150 animals for milking and pay them at the same rate at which I am being paid by the Hospitals and do not benefit by even a pie to pay for my establishment of supervision of milking alone. I have to maintain an establishment of for supervision at a cost of Rs.150/- to see that the milkmen do not play any mischief and spoil the name for quality which I have built up. Though it is understood that the milking is done under the Hospital supervision, it has been found quite impossible to manage a crowd of that magnitude viz. 150 animals with calves, attendents and owners. It was after considering all these points that I want to adopt the following procedure for the next year:-

1. Division of sources of supply.
2. Filtering and pasteurising before delivery.
3. Issues from a cold store to regularize times of delivery.
4. Obtaining of supplies from village animals which have more fodder than city stall-fed animals which are mostly fed on bran, husk and salt-water, and available at a cheaper rate.

It is needless for me to draw your attention to the condition existing in the West. The milk supplied to large cities are mostly from organised creameries which handle all milk from the country tracts. It was after study of such conditions that I have taken up the work here also. I must admit I have not reached such perfection but can assure you that it is far in advance of any other commercial institution of the kind existing here. In this connection, I shall also take up the opportunity to answer some imaginary practices, I am supposed to have incorporated in my system of working. You would have found that

that these alleged practices are nonexistent in my system of working, if you had only given me a chance to explain and show you the services I can offer.

There is a belief that all kinds of milk is mixed up and pasteurised and delivered. In regard to the above, I write to assure you that there are only two kinds of milk available It has been our practice that these are milked and brought out separately. The buffalo milk which does not form even 10% of the supply is delivered straight to Hotels and does not go in for pasteurisation.

That milk is stale and is being issued and is not fresh. This can be very easily verified by adopting the Methilene Blue Test which is a very simple process. The milk is issued within six hours after pasteurisation during which time it is kept fresh in our cold store at between 35° to 40° F.

I have always tried to avoid hurry in work and have always planned out that there should be plenty of time to finish work to a perfection. In the introduction of pasteurising before supply I have not only been able to add a measure of safety to milk but have plenty of time to see that issues both regular and extras are properly delivered in time. To hurry through milking brings with it the dang r of the milk at the kitchen being imperfectly boiled.

It was contended last year when the question of pasteurised milk was before the Committee that our pasteurisation was imperfect as the verdict passed was "Live organisms present" and not fit for hospital supply.

To get at the standard required for pasteurised milk? I made a reference to the Imperial Dairy Expert and got the tests done by them at the Imperial Dairy, the copies of correspondence of which I herewith enclose for your information. The opinion expressed before your committee must be either that the milk is not sterile as per standards of sterilised milk, or it has been mistaken that Pasteurised milk is supposed to be sterile.

sterile.

According to the food adulteration act and standards for pasteurisation of milk and according to conditions existing in the West (where temperatures are more favourable) there is an allowance of 30,000 bac: per C.C.) Again. "Live gemms present may be pathogenic or non-pathogenic. Lactic acid baccilus which is so essential for system may be present and a milk cannot be condemned on that score, because they, being germinated again.

In view of the above facts and my not being given an oppertunity to show you what quality and service I can offer to your hospital. I shall be extremely obliged if you can for the coming year allow me to show you the service I can offer to the best advantage of all concerned.

I am also always open to the advise of the committee and frequent inspection and suggestion for improvement of the standards of milk.

I sincerely trust that my efforts to give you satisfaction and service this year will not go without reward and hope my suggestions and in the mode of supply will be accepted after due consideration by your committee and if need be arrange for a day to look aver my arrangements which I have put up at a such a cost.

I have been wanting to call on you personally and put the matter before you but found that you were busy to spare the time for having a lengthy discussion. So I have taken the liberty of putting the matter in writing so that the same be put before the committee before calling for tenders for the coming year.

In conclusion, I beg to assure you that as an educated and qualified man in line, I shall be able to offer you a quality product with service conscentiously, and trust you will after due consideration help me for the coming year.

Yours faithfully

True Copy of letter No.5/3758 dated 26th March 1936 from the Imperial Dairy Expert, Bangalore to The Managing Proprietor, The City Milk Supply, Mysore.

Reference your letter dated 21st February 1936.

I give below the information regarding Pasteurised milk, required by you:-

1. The average count in pasterurised milk varies from 3,100 to ~~28,40~~ 28,400 per C.C.

2. The counts are generally taken 15 hours after the milk is stored at a temperature of 50°F.

3. There are no Bacterial standards in India. The standard prescribed by the ministry of Health in Great Britain are as follows:-

Certified milk and grade A milk pasteurised:-

The milk must not contain more than 30,000 organisms per C.C. and must not contain coli bacillus in 1/10 C.C.

4. This question is more or less answered above. For climatic conditions in India the number of counts will naturally be higher than those fixed for Western conditions.

5. No tests are carried out for pathogenic organisms in milk. In fact, with the strict sanitary conditions observed at the time of producing milk and subsequent pasteurisation of milk, this test is absolutely unnecessary.

6. At the Dairy Institute milk is pasteurised by the "ODIC CONE HEAT EXCHANGER", which is the most up-to-date Pasteurising

Pasteurising machine to be found in the market. The milk is heated to 150° F., and cooled to 40° F., suddenly. The machine has been found to be very efficient in destroying bacteria without, in any way affecting the cream line.

I should always be pleased to give you any further information on the subject if desired.

Subject Tender for Milk Supply.

The Secretary,

The Victoria, Vanivilas and Minto Hospitals,

B a n g a l o r e.

9/11/36

Dear Sir,

With reference to your notification in the Mysore Gazette dated, 16-10-1936 calling for Tenders for supply of Cow's Milk to the above hospitals, we beg to enclose herewith our tender for the same.

We are enclosing herewith an alternative Tender for supply of Pasteutised Milk from Cold store on the following conditions :--

1) Supplies will be made thrice-Daily, Viz., at 5 A.M., 9 A.M., & 5 P.M., in sterlised Galvanized Steel Containers sealed and delivered at the Central Kitchen.

2) We agree that our milk may be tested by taking a sample from any of the sealed cans and taken in the presence of our representative.

3) We agree that we shall freely replace immediately any milk spoilt or otherwise due to any fault in our handling.

We gaurantee the Milk as follows:-

1) That it will be pure Cow's milk pasteurised by the low temparature positive holding process.

2) That it will have a specific gravity between 1.028-1.032 at 60°F.

3) That the fat percentage will not be less than 3·5.

4) That Solids not Fat will not be less than 9%.

5) That the Ash (Nitrogen) will not be less than 0·6.

6) That the milk when delivered will not be more than 12 hours maintained at between 40° & 45° F.

We are able to give you a more favourable rate on this Tender as we are giving you the benefit of cheaper buying from outside.

Our centres of milking are open to inspection and we are always open for correction and improvement.

We shall thank you to give this your consideration and assuring you of our best attention.

Yours faithfully,

Subject

The Private Secretary
to The Dewan Saheb to
His Highness The Maharaja of Mysore
B a n g a l o r e

Dear Sir,

Further to our letter dated 10-1936, enclosing copies of our correspondence on the subject Viz., supply of milk to the Bangalore Hospitals for the Year 1937. We are enclosing herewith copy of further correspondence for the information of Dewan Saheb.

While very much thanking the Dewan Saheb for having so very kindly entrusted us with the supply of the Three institutions we have done our best during the Year to give every satisfaction to the hospital authorities even without regard to the cost. Our previous letters would have given the Dewan Saheb an idea of the difficulties we had to and are in spite of which we have successfully been supplying the hospitals.

We now note that with calling of tenders for the next year the committee have received some rates which are quite impracticable to supply unless recourse is taken to questionable methods.

We feel that the only course left open to us is to submit to the Dewan Saheb the position as it is. So that he will be able to help us in a case he should think we deserve help.

In this connection it will not be out of place to mention that we are trying to put our institution on a permanent foundation and arrangements have already been made for erecting at Mysore for a building of its own. Just when a scheme of expansion and permanency with a feeling of having the support of the Government, we are now faced with an unhealthy and ruinous competition. We still feel that we shall have the fullest support of the Dewan Saheb by representing our position so that an institution of our kind may develop as it ought to under the patronage it has all time been getting.

We shall thank you to kindly place the matter before the Dewan Saheb for his consideration and oblige.

The President,
Board of Management,
The Victoria, Vanivilas and Minto Hospitals,
B a n g a l o r e.

Dear Sir,

Further to our letters and Tender for supply of Milk to the Hospitlas for the comming Year we beg to lay before you the following points for further consideration of your Committee.

1) That you must have been convinced by now that it is not honestly possible to take up a supply of milk at rates rediculously quoted by other tenderers with-out resorting to objectionable practices.

2) That a supply of this magnitude and importance cannot be taken by ordinary people who cannot bear the brunt of a heavy loss which might possibly end in being let down during the Summer Season.

3) That a consideration ought to be given to the efficient Service and quality we have offered you in spite of heavy losses during this year which the hospitals have not had for the last so many years.

4) That a consideration ought to be given to the wide experience we have in the field of wholesale milk supply both at Mysore and Bangalore and to the public at large together with the Scientific and Business methods employed by us to give a service which is regular and punctual without causing any inconvenience to the hospital staff.

In this connection we might mention that our Quality, methods and service have been appreciated by the Imperial Department of Daiming and the Live stock section of the Department of Agriculture Madras, who have sent in their students and officers to study our methods to open such Institutions in their own areas. We might also mention that references may be made to them regarding our work to further safe|gaurd the intrests of hospitals.

In conclusion may we be allowed to mention that our institution is run and managed by an educated and qualified man and that to expect him to take up methods employed by the itinerant milkman is not fair.

We have tried our best to show you the services and usefulness we can be of to you and expect you will give us the benefit of your patronage for the comming years in spite of other tenders received, who might to all outward appearance-s be cheaper.

We have appealed to you with a right that is open to an Honest Institution to give us fair treatment and demanded for a rate that is workable without ruining ourselves. If it should please your committee to recognise our right and appreciate our efforts to be Honest, we shall not be found wanting in service if you should entrust us with the supply for the comming year.

Thanking you for a consideration and recommendation to the Government if you should find our claim fair.

Yours faithfully,
For THE CITY MILK SUPPLY
Krishnaswami

MYSORE MEDICAL DEPARTMENT

Med 96-36-3

Telephone No. 215

OFFICE OF THE SENIOR SURGEON IN MYSORE,

No. 4.C.92-3

Enc. 20

Bangalore, dated the 26-11- *1936*

From,

Sastravaidya Pravina

S. SUBBA RAO, Esq., B.A., M.B.C.M., M.R.C.S., (Eng.) L.R.C.P., D.P.H.,

Senior Surgeon with the Government of H. H. the Maharaja of Mysore.

To

The General Secretary to the Government of
His Highness the Maharaja of Mysore, Bangalore.

Sir,

With reference to your letter No.G.2743/Med.96-36-2 dated 29-10-1936, I have the honour to forward herewith a copy of lett No.3990 dated 23-11-1936 received from the Registrar of Co-Operative Societies in Mysore who was requested to favour me with his opinion whether the milk men could be organised so as to ensure a reliable supply of milk required for the Combined Hospitals in Bangalore. He states that the Kamadhenu Co-Operative Society can undertake the supply of pure milk @ 11½ pints per Rupee.

I am in this connection also enclosing tenders in triplicate, together with a comparative statement, received for the supply of milk for these Hospitals for the coming calendar year. From enquiries instituted in regard to the credentials of these tenders I understand that they are small owners of cattle and cannot individually cope with the normal requirement of as much as 1000 pints of milk daily for these three Institutions. Some of these tenderers are, I learn, ~~are~~ members of the Kamadhenu Co-Operative Society but whether or not they hold memberships at present, it is open to them to enroll themselves as members, if they wish to do so, for purposes of participating in the supplies to the three Hospitals.

The suggestions of the Registrar of Co-Operative Societies appear sound and practicable and ~~if~~ the contract for supply of milk for 1937 at 11½ pints per Rupee may be entrusted to the Kamadhenu Co-Operative Society as recommended. As the Society has to equip themselves and appoint sufficient staff for commencing their supplies on the 1st January next, I request that orders be issued early as it least one month's time will be necessary for

Letter No.3990 dated 23-11-1936, from the Registrar of Co-Operative Societies in Mysore, Bangalore, to the Senior Surgeon in Mysore, Bangalore.

With reference to your letter No.G.C.92/36-37 dated the 4th November 1936 and subsequent reminder thereto, regarding the supply of milk to the Combined Hospitals in Bangalore, I have the honour to state that I held a meeting of the members of the Kamadhenu Co-operative Society yesterday in the Apex Bank Hall and discussed the matter with them. The members of this Society who are all owners of cows are agreeable to supply pure milk at 11½ pints per rupee.

2. To guarantee the supply and purity of milk, it is proposed to appoint a Veternarian as Superintendent who will be present while the cows are milked in the Hospital compound.

3. As the supervision and clerical charges will come to about Rs.150/- a month, it is not possible to agree to supply milk at more than 11½ pints per rupee for the present. If after working for a year it is seen that some profits are realised, I will arrange to supply milk at a slightly higher quantity per rupee.

4. There is a possibility of others tendering to supply milk, cheaper, but one may not be sure of its purity. I understand that skimmed milk is some times added and passed off as good milk. I have told the members that the Society's name should stand as a guarantee for purity of the supply of milk. If the rate quoted by the Society is acceptable to you I will go ahead, to obtain, the necessary individial agreements from its members in favour of the Society and make the necessary further arrangements for starting supply from the date, the previous contract expires, which I hear is the 31st December 1936.

"Copy".

S. Subbarao

Senior Surgeon.

OFFICE OF THE SECRETARY, VICTORIA, MINTO OPHTHALMIC, VANI VILAS AND CHILDREN'S HOSPITALS, BANGALORE.

Tender Notice dated 16th September 1936.

Notice is hereby given that sealed tenders, in triplicate, on half-sheet foolscap sized paper, will be received at the Office of the Secretary, Victoria, Minto Ophthalmic and Vani Vilas Hospitals, Bangalore, by the undersigned at 11 A.M. on Monday the 9th November 1936, at his office in the Victoria Hospital for the supply of *Cows' milk* required for the use of the said Hospitals from 1st January 1937 to 31st December 1937, inclusive.

2. No tenders will be received after the date and hour abovementioned.

3. Tenders to be superscribed "Tender for the supply of *Cows' Milk* to the Victoria, Minto Ophthalmic, Vani Vilas and Children's Hospitals."

4. No tender will be received unless accompanied by a deposit of Rs. 200 in cash, or Currency Notes or Treasury Receipts.

5. Tenders will be opened by the Secretary at his Office in the Victoria Hospital, Bangalore, on the date and at the hour abovementioned in the presence of such tenderers as may choose to attend.

6. The rate for the item must be specified in figures as well as in words. The value of the tender must be worked out according to the rate tendered and the total value must also be entered in words in ink. Tenders not conforming to this rule will be rejected.

7. The quantity stated in the list is not guaranteed.

8. The Senior Surgeon does not bind himself to accept the lowest or any tender or to assign any reason for not accepting any tender.

9. The deposit of the successful tenderer will be retained, and will be forfeited to Government if he fails to complete the contract by executing the necessary agreement and furnishing the required security to the amount of Rupees One Thousand, within three days from the date of receiving information of the acceptance of his tender.

10. No advance of cash will be made to the contractor. Payments for the article supplied in each month will be made, as soon as possible, after the 15th of the following month on his producing the necessary bill with vouchers.

11. For the supply of milk, the cows to be milked on the premises should be ready at 7 A.M. and 5-30 P.M. every day and milking must be over by 8 A.M. and 6 P.M. daily. Cows that are unhealthy will not be allowed into the milking shed.

12. The contract must not be sublet.

13. A fine not exceeding Rs. 50 will be levied by the Medical Officer of the concerned Hospital for any infringement of the terms of the contract or for the supply of inferior milk and the contract itself will be annulled and the security confiscated to Government in the case of the continued or frequent violation of the terms of the contract, the defaulter being further liable to make good any loss that may result to Government by the annullment. If the contractor thinks that the fine levied in any case is not justifiable he may appeal to the Senior Surgeon (who will have power to fine up to Rs. 100).

14. In case the contractor ceases to abide by the contract at any time during the currency thereof, he shall forfeit the security amount to Government and also be bound to make good to Government any loss which may arise from such cessation.

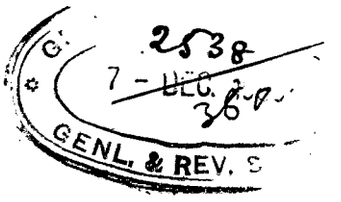
THE POPULAR STORES, SAMPIGE ROAD,
MALLESWARAM, BANGALORE CITY.
Bangalore, 7th December 1936.



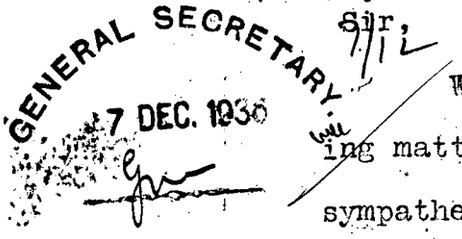
To

THE SECRETARY TO THE GOVERNMENT OF

HIS HIGHNESS THE MAHARAJA OF MYSORE,

MEDICAL DEPARTMENT, BANGALORE.

Has he felt regarding this been subd to the Member? Ino



Sir,

We most respectfully beg to lay before you the following matter in the hope that it will receive the careful a n d sympathetic consideration of Government.

Some time ago we submitted to the Senior Surgeon our tender for the supply of milk to the three major medical institutions in the City for the year 1937, in response to the kind invitation of that officer in that behalf.

While we were patiently waiting for Government Orders regarding the final disposal of the tenders received by them, our attention was drawn to a statement in the Daily Post of the 24th November 1936, to the effect that the Registrar o f Co-operative Societies in Mysore has arranged to supply the required quantity of pure milk to the hospitals on Co-operative basis instead of the present practice of supply by tender system and that the work has been accepted by the Kamadhenu Co-operative Bank.

In the same newspaper, dated 26th idem, a correspondent exposes the dilemma in which the accepting Government Officer is placed in consequence of the absurdly low rates fixed for diet articles under the tender system and proposes to watch for the decision of Government regarding disposal of the tenders for the supply of milk now before them.

In this cpnnection, it may not be out of place to consider

consider whether any change of the existing tender system is called for. Leaving out the Contractor, who is supposed to be earning huge profits which ought properly to go to some one else, there are three parties vitally interested in the matter, viz., (1) the Government who are called upon to pay for the supply, (2) the poor milkmen who own the cows and give the supply and (3) the helpless inmates of the hospitals who use the milk supplied. As stated by the correspondent, the Government have usually been accepting the cheapest of the tenders and obviously, therefore, the tender system cannot affect their interest adversely. As regards the milk men, through whom the supply is arranged by the Contractor, there has so far not been, to our knowledge, any charge of exploitation of the former by the latter or any complaint (as in the case of agriculturists and money lenders) to justify any intervention by Government. Coming to the patients, we feel sure that their interests have always been adequately guarded by the Medical Officers in whose charge they are placed. Even granting, for the sake of argument, that the patients have suffered in consequence of such objectionable practices as are implied by the Correspondent, the remedy would seem to lie in placing the supervision of the dieting of patients in the hands of Sisters whom it will be difficult to deceive as regards the purity of milk and who work for the love of God and therefore, will never enter into a league with either the Contractor or the hospital menials.

Adverting to the step reported to have now been taken by the Medical and the Co-operative Departments, viz, getting the milk supply through the agency of Kamadhenu Co-operative Bank, it is not known whether the concern is composed of milkmen who own the cattle and supplying the milk to the hospitals or is only a combine of a few, but more fortunately

fortunately placed, members of the community who are able to act as Bankers. In the former case, the object desired by the correspondent, viz., the elimination of the undesirable middle man-Contractor, will have been gained to some extent. In the latter case, however, the result will merely be the displacement of the existing Contractor-middleman by a different kind of middleman, in spite of his title being made to contain the expression "co-operative."

It is beyond our province to question either the equity of inviting tenders and then giving away the work to some agency which did not submit any tender, or the preferential merits of the proposed change as compared with the existing tender system. We would content ourselves by inviting the kind attention of Government to paragraph 12(c), page 9, of the Report on the working of the Madras General Hospital for the year 1929 and pondering over the question, how far the system of milk supply to Hospitals through the Co-operative Agency will succeed in Bangalore when it had failed in a City like Madras and, therefore, been given up.

We would further state, in conclusion, that, if it should appear to Government that there may be some advantage in entrusting the work to two or more competent agencies, so that, if one of them should happen to fail, the others may be asked to carry on the work without any inconvenience to the hospitals, and if we should happen to be among the chosen ones, we are prepared to add to our present earnest money such further sum as would bring it to 10 % of the total value of our share of the supply, as a guarantee of our rendering prompt and faithful work.

We beg to remain, Sir,

Your most obedient servants,

V. Madeswaran

ANNUAL REPORT AND STATISTICS

OF THE

GOVERNMENT GENERAL HOSPITAL, M A D R A S

FOR THE YEAR

1 9 2 9.

—

Page: 9.--

12. Supplies:--

(c). M i l k . -- Under orders of Government, the milk contract for 1929-30 was given to the Co-operative Milk Supply Union at a rate of Re.0-2-7 a pint, a reduction on previous prices, and Re.0-0-9 less than the bazaar rate which according to the Tahsildar's information stood at Re.0-3-4 a pint. On October 21st, the milkmen without any previous warning stopped the supply through their Society and the hospital experienced very great difficulty in meeting the requirements of patients, for the majority of whom milk is of vital importance. The emergency was met by using tinned milk until arrangements could be made for supply by a contractor at a rate of Re.0-3-2 a pint for the remainder of the year. The difference in the cost amounting to Rs.5,163 was met by Government. The reason given by the milk men for breaking their contract was that they were dissatisfied with the price they obtained.

"TRUE EXTRACT"

GENERAL SECRETARY
9 DEC. 1936

Dated 8th Dec.1936.

Fin 2857/376

To

(1).The Second Member of Council
to the Government of Mysore, Bangalore.

(2).The First Member of Council
to the Government of Mysore, Bangalore.

(3).The General Secretary to the Government of Mysore,
Bangalore.

Most Honoured Sir,

We beg to state that the City Milk Supply Co. of Narasimharaja Road, who are the current year's Milk Supply Contractors to the three principal Hospitals of the City, have been worrying their present milk suppliers to them to enter into an agreement to supply at 15 lbs. per rupee for drawn milk during 1937, instead of at 14 lbs., their current year's rate. They seem to have quoted, for 1937, 9 pints per rupee for pure drawn-milk on the spot and 10 pints for pasteurised milk, which they would send from their premises. They have been saying that the Government might perhaps accept their tender for pasteurised milk to be introduced to these 3 hospitals here, as they have done so at Mysore City. We beg to state in this connection, although it is not within our province to question the equity of accepting the rate of the City Milk Supply Co., for pasteurised milk who it seems have quoted the said rate with some questionable motives perhaps, that when the published tender notice was not for the same, yet, it is presumed, that it is permissible for public people like ourselves to lay bare the situation in the interests of suffering humanity for whom the said milk is meant, that it may work bad with the suffering patients and that such pasteurised milk might be an adulterated one, as, for the reason that, the said Company seem to have quoted, in their tender for 1937, 9 pints for pure cows' milk drawn on the spot and 10 pts. for pasteurised milk: if it is genuine pure cows' milk that is being pasteurised for supply, the quoted rate should naturally be less than that of pure cows' milk

which

which is raw and drawn on the spot, for, incidental expenses of pasteurisation have to be added to the cost of pure cows' milk, which would necessarily increase the rate of pasteurised milk rather than decrease the same; and this decrease, we fear, may be possibly due to only adulterated milk being only pasteurised and not pure freshly-drawn-cows'-milk.

The above facts may kindly be taken into consideration and only the individual cow-owners be encouraged to give supplies of freshly-drawn-cows'-milk only and not pasteurised (perhaps adulterated) milk.

If the authorities are bent upon only pasteurised milk being supply being taken, the next year, a separate tender notice be kindly issued, so that the Imperial Dairy Farm and others who have got facilities or own apparatus for same may compete with one another and quote most favourable rates to Government, which ultimately ensures the purity of supply.

For which act of kindness, we shall ever be highly grateful.

We beg to remain,
Most Honoured Sir,
Your most obedient servants,

Pet. No. 585

OFFICE OF THE DEWAN OF MYSORE,

Bangalore, Dated 9 . 12 . 1936

The accompanying petition addressed to the Dewan is forwarded, with compliments, to the Secretary to Government, General *Department,* for favour of disposal.

GEN... SECRETARY. 10 DEC. 1936

By Order,

Adi K. Sett

for Private Secretary to the Dewan.

10/12/36

OFFICE OF THE DEWAN OF MYSORE.
Date of Receipt 9.12.36
From Dept. No. 5585

Amin-ul-Mulk

Sir Mirza M. Ismail, K.C.I.E.,

Dewan of Mysore,

BANGALORE.

Honoured Sir,

We, the undersigned, most humbly and respectfully beg to bring the following to your kind notice:

(1). We are some of the milkmen that are at present leading our cows to the premises of Victoria Hospital daily - both morning and evening - to supply the requirements of Milk to the three leading Medical Institutions, through the City Milk Supply Company who have been appointed as Contractors for supply of Milk for the current year.

(2). About 2 months back, a Memorial was submitted to the learned Second Member of Council by some of us, requesting him to give us a chance at least this year (1937) to supply milk to the three aforesaid Important Medical Institutions DIRECTLY & NOT THROUGH ANYBODY AS MEDIATORS BETWEEN GOVERNMENT AND OURSELVES and clearly explaining the position that the said favour, if kindly granted by Government, would result surely in considerable savings.

(3). We are given to understand, now, that the learned Second Member of Council viewed the said Memorial very sympathetically and that it has been ordered that a Co-operative Society may be formed for us through the Registrar of Co-operative Societies and that some supply out of the aggregate to the three institutions would be taken from us.

(4). Some three milkmen of Akkipet, who have submitted tenders for the supply of Milk on 9th November last, somehow came to know of the orders and intentions

intentions of the learned Second Member of Council; and they, being the shareholders of the Kamadhenu Co-operative Society, induced the concerned officers - thereof to invite the Registrar of Co-operative Societies to preside at a Meeting of their constituents to be held at the Apex Bank; with the result that the Registrar was struck with their idea and gave his consent to it; and, finally, it was unanimously resolved that those constituents should form a Society to supply Milk to the three institutions at FIVE SEERS PER RUPEE.

(5). It has, thereafter, been learnt that, at the instance of the Registrar of Co-operative Societies, the Senior Surgeon has definitely recommended to the Government to give the Milk-supply to the said Kamadhenu Co-operative Society at 11¼ pints per rupee. Thus, the Five-Seers-proposal (which works at 11 pints per rupee) was enhanced by the Senior Surgeon to eleven and a half pints per rupee. These two, viz., the resolution arrived at as stated in para 4 above and the recommendation of the Senior Surgeon for eleven and a half pints supply, are at variance to each other completely, with the result that this would be totally unworkable.

(6). We are thus kept in the dark with regard to the above movements, although we were chiefly instrumental for the emanation of the said proposal from the Hon'ble the Second Member of Council.

(7). We may be permitted to further state that the said Kamadhenu Co-operative Society is a Banking concern dealing also in fodder requirements of their constituents. To tell Your Gracious Honour the whole truth, that Society has had no experience of the intricacies of the milk-supply affair, as, at no time eversince the inception of the said Society, they have taken up to trade in milk-securing the same

same through their constituents: this move, surely, is in the self-interests of three persons only, viz., Lingappa, Nanjappa and Puttappa--all of whom have in league submitted separate Tenders to the Senior Surgeon, --and not in the interests of any other Professional Milk Suppliers, with the sole object of putting a stop, entirely, to our milk supply to the three institutions, which we have been satisfactorily doing for years under various contractors, but have, from next year onwards, made bold to come into direct contact with the benign Government for mutual advantage--of Government and our humble-selves. These three individuals are, indeed, shareholders of the said Society which, of its own accord, could not have surely made any such move in the matter--being incompetent for such purposes.

(8). At present, all communities alike--Mahomedans, Brahmins, Devangas, Thigalars, Adi-Karnatakas &c.,-- have taken to Milk-Supply Problem and have become almost professional in this line; so much so, they have actually replaced the pucca Kavadigar-professionals; with no other object but to simply eke out their livelihood by this honest profession DURING THESE DAYS OF UNEMPLOYMENT FOR THE EDUCATED. Some of these persons have been suppliers from a long time--15 years--to the three Medical Institutions in question. The so-called caste-milkmen (Kavadigars) of Akkipet have now taken up to maintain only buffalos since more than a decade, as in that they find more profit and, consequently, they have stopped supplying cow's milk to the three medical institutions even through the contractors.

(9). If the present proposal of the Senior Surgeon, at the instance of the Registrar of Co-operative Societies who is quite unaware of as to who the real suppliers to the medical institutions are, is to be given effect

effect to, we shall surely fall into the catastrophe of being entirely shut out of the present field/our honest avocations in life from 1st January next, resulting in starvation to both ourselves and our innocent cattle.

(10). Had it not been for our timely coming with our cows to the spot (for supplying pure cows' milk to the hospitals), this year, there would, surely, have been a lot of inconvenience felt by all concerned in having entrusted the supply to the City Milk Supply Company who were and are not maintaining cows just like the present Co-operative Society; and, as a matter of fact, during January last, permission had to be given to them (Milk Supply Co.) to bring side-milk for supply WHICH WAS QUITE CONTRARY TO THE TERMS OF THE TENDER NOTIFICATION, which was mainly due to the fact that the so-called milk-men of Akkipet kept themselves aloof from the said Company who were the contractors.

PRAYER.

In these circumstances, we humbly pray that a separate Co-operative Society be ordered to be formed among ourselves by the Registrar and the Milk Supply be kindly granted to such Society at the rates fixed already (by the Senior Surgeon to the Kamadhenu Co-operative Society). Or, if this is to be considered as too late a prayer of ours, at least a portion of the contract be kindly given to any of the other tenderers at the same rate with the express condition that we alone must be engaged to supply that portion. This step will surely be a safeguard to the efficient supply, for, in case of break-down of that portion of the supply entrusted to Kamadhenu Society (owing to inevitable causes), we shall undertake to supply the entire portion as we have been doing hitherto under various contractors including the City Milk Supply Co.

Bangalore,
7th Decr. 1936.

ERAL SECRETARY.
9 DEC. 1936

GENL. & MIN. R
9 - DEC. 1936
379
GENL. & REV. SECT

N. Madhava Rau, Esq., B.A., B.L.,
Member of Council,
Bangalore.

Honoured & Respected Sir,

We beg to state that we hear that the Kamadhenu Co-operative Society of the City New Market have been entrusted with the Milk supply of Victoria, Minto Ophthalmic and Maternity Hospitals; if it is so, the following facts should be considered side by side with this question, duly weighed:

(a). The Directors and shareholders are not at all experts in the supply of milk: they are not professionalists.

(b). In the city limits, there are more than 3 to 4 thousand people who have taken this Milk Supply trade to live upon. The said society cannot even claim about 4 per cent. of them as their members of shareholders.

(c). This society has hardly any business knack of the regular supply of milk: this society is quite unlike Malleswaram Co-operative Society, City Co-operative Society, Basavangudi Co-operative Society: it is not functioning properly and for only namesake it is in existence for the so-called benefit of the professionals, which in fact is not.

(f). They have no experience in milk trade and they do not therefore know even the rudimentary principles thereof.

(g). They are ignorant of this trade, which fact is quite glaring, as they are quite unaware of the relationship of a pint and a standard seer of Government; as such, by accepting eleven and a half pints per rupee fixed by the authorities, who, it is regretted to find, are labouring under a great misconception of the prevailing market rate and the capacity of seer and pint.

(h). The authorities of the Kamadhenu Society have not shown to outside public that they are equipped with all sorts of ways and means for the disposal of the surplus quantity of milk that may happen to remain after issuing the requirements to the three institutions, as the cows that may be kept for such supplies may yield more than what may be exactly required for the day. It is surely a mishap to society:

(i). The daily requirements of the hospitals are not at all stable. They vary as per admissions and discharges. At times, the yield may fall too much short of the actual requirements. Rules do not permit of outside milk being brought to make up the shortage. If the society really maintains any cows and sufficient establishment for their maintenance and disposal of surplus milk etc., and ways and means as to how to meet the extra contingencies,&c., none of which unfortunately they have, everything would have been quite O.K. But, it is not the case!

(j). It is but very natural that epidemics break out among cows during summer and other seasons and cows die and yielding goes in that case, for much less than the actual requirements. In case of such contingency, it is a matter for the authorities to ascertain how this Kamadhenu society will be able to cope up with the supply.

(k). In a presidency Hospital outside Mysore State, it is learnt that it so happened that,about 7 years back,~~that~~ there was utter failure of milk supply under taken by a milk supply union owing to the strike of their constituents who were utterly dissatisfied with the rates. In the present case also,there is such a likelihood, for, 5 seers fixed ~~by~~/the Meeting held at Apex Bank would work out to 11 pints (one seer is equivalent to 44 ozs: a pint means 20 Ozs.) only, out of which half or three-fourths pint should be deducted to meet all incidental expenses to-wards staff &c.,and there would hardly remain 10 1/4 pints/ ~~xxxx~~ to be quoted for supply; but, the Senior Surgeon has fixed 11 1/2 pints per rupee and the society,in this case,has to ~~deduct~~ extract 3/4ths pint towards expenses to staff &c.,resulting in the Milk Men's supply at 12 1/4th pint per rupee to the Kamadhenu society. Is it ever possible for the milkmen to keep on with the supply during all seasons of the year at this rate? No, not at all!

In conclusion, we beg to state that it is highly desirable that the Government, ~~in the interests of the three important institutions, should consider all these~~ and safeguards in this important article of diet by way of additional hands being kept in reserve,before entrusting the supply to such society as Kamadhenu society--in-competent as it is--for reasons set forth above. For this act of kindness, we shall ever be highly grateful.

We beg to remain,
Honoured and respected Sir,
Your most obedient s e r v a n t s ,

5th December 1936.

Copy most humbly given to the General Secretary to the benign Government of His Highness the Maharaja of Mysore,Bangalore, for information and favourable disposal, so as to benefit one and all in the line.

THE ORIENTAL MILK PRODUCTS
(REGD. PARTNERSHIP FIRM)

2, Lal-Bagh Road.
BANGALORE CITY.
Dated 10- 12- 1936.

General Secretary
with compliments. To

Rajamantrapravina
S. P. Rajagopalachari, Esq., B.A., B.L.,
Member of Council,
Bangalore.

Most Respected Sir,

In response to Tender Notice published in the Mysore Gazette, during September last, for the supply of pure Cows' Milk freshly drawn on the spot to the Victoria, Vani Vilas and Minto Ophthalmic Hospitals, Bangalore, we have submitted our tender to the Secretary of the above three Hospitals on the 9th November 1936.

With regard to our credentials, we beg to state that we are a registered Partnership Firm of 4 capitalists and professionals, dealing in milk, milk products and fodder, with a substantial capital. We own at present 22 cows whose yielding capacity is about 70 seers in the morning and about 60 seers in the evening. We have vast experience in the Business. On account of the growing demand for milk and duly encouraged by our customers, we hate, besides the above of our own, engaged, by paying advances, other milkmen to lead their cows to our business premises: and by this, the aggregate yield, per day, would come up to 300 seers or thereabouts.

We are given to understand that the Government have no intention of dealing with us, on the presumption that we are exploiting middlemen, attaching thereto considerable unfounded implications due to malicious misrepresentations

misrepresentations of interested people to gain their own end, some of whom, we have come to know now, are the actual tenderers for the said milk-supply. To erase out the said impression from the mind of the authorities, we beg to bring the following to your kind notice:-

(a). The usual practice of the so-called middleman, after securing Government contract, is to advance money to people - owning cows, fixing a reasonable rate for the supply, thus ensuring regular supplies throughout.

(b). At no time during the course of the supply, eversince the so-called middlemen have taken up the contract of milk supply, the concerned authorities have reported to Government against them re: irregularities affecting the welfare of the patients, nor have the Government received any report from constituent milk-suppliers as to the said middlemen having fleeced them to starvation by - extracting abnormal rates.

(c). Owing to economic depression in the trade, the supplying rate of milk has gone to even 16 pints per rupee about 5 years back (a reference to Hospital records will show) and the consequent ill-effect on the milk suppliers are in no way to be attributed to the so-called middlemen-contractors. On the other hand, these - middlemen have been ruined, not able to recoup the enormous amount advanced to the milk suppliers of hospitals.

(d). Owing to the entry of middlemen in the field of competition of hospital supplies, the Government have been making considerable savings year after year, although the number of in-patients in the said three institutions have been increasing by leaps and bounds year after year. A reference to the hospital records to find

THE ORIENTAL MILK PRODUCTS
(REGD. PARTNERSHIP FIRM)

2, Lal-Bagh Road,
BANGALORE CITY

Dated.....193

find the amount spent for diets, about 18 years back, for the number of in-patients then, and the amount spent for the enormous number of in-patients now, will disclose the bare fact.

We are now given to understand that arrangements are likely to be made for the supply, through the Registrar of Co-operative Societies in Mysore, who is undertaking the concern on behalf of the Kamadhenu Co-operative Society, Bangalore City. We are given to understand that the said society is just now intending to enter on the field and have not even started with the preliminary arrangements for a huge supply to the three institutions. Our firm being in the working order, with a substantial capital, a portion of the entire requirements, however meagre it may be for the present, may be entrusted to us at 11 3/4 pints per rupee quoted in our tender, or, at the rate that may be awarded for the said Kamadhenu society. We undertake to keep on with the supply inspite of all varying conditions of the demands due to the natural unstable hospital requirements of the day. We will deposit as security any amount that may be fixed by the concerned authorities.

For which act of kindness, we shall ever pray.

We beg to remain,
Most Respected Sir,
Your most obedient servants,

M. N Lingam

Most Respected Sir,

In response to Tender Notice published in the Mysore Gazette, during September last, for the supply of pure Cows' Milk freshly drawn on the spot to the Victoria, Vani Vilas and Minto Ophthalmic Hospitals, Bangalore, we have submitted our tender to the Secretary of the above three Hospitals on the 9th November 1936.

With regard to our credentials, we beg to state that we are a registered Partnership Firm of 4 capitalists and professionals, dealing in milk, milk products and fodder, with a substantial capital. We own at present 22 cows whose yielding capacity is about 70 seers in the morning and about 60 seers in the evening. We have vast experience in the Business. On account of the growing demand for milk and duly encouraged by our customers, we have, besides the above of our own, engaged, by paying advances, other milkmen to lead their cows to our business premises; and by this, the aggregate yield, per day, would come up to 300 seers or thereabouts.

We are given to understand that the Government have no intention of dealing with us, on the presumption that we are exploiting middlemen, attaching thereto considerable unfounded implications due to malicious misrepresentations

misrepresentations of interested people to gain their own end, some of whom, we have come to know now, are the actual tenderers for the said milk-supply. To erase out the said impression from the mind of the authorities, we beg to bring the following to your kind notice:-

(a). The usual practice of the so-called middleman, after securing Government contract, is to advance money to people - owning cows, fixing a reasonable rate for the supply, thus ensuring regular supplies throughout.

(b). At no time during the course of the supply, eversince the so-called middlemen have taken up the contract of milk supply, the concerned authorities have reported to Government against them re: irregularities affecting the welfare of the patients, nor have the Government received any report from constituent milk-suppliers as to the said middleman having fleeced them to starvation by - extracting abnormal rates.

(c). Owing to economic depression in the trade, the supplying rate of milk has gone to even 16 pints per rupee about 5 years back (a reference to Hospital records will show) and the consequent ill-effect on the milk suppliers are in no way to be attributed to the so-called middlemen-contractors. On the other hand, these - middlemen have been ruined, not able to recoup the enormous amount advanced to the milk suppliers of hospitals.

(d). Owing to the entry of middlemen in the field of competition of hospital supplies, the Government have been making considerable savings year after year, although the number of in-patients in the said three institutions have been increasing by leaps and bounds year after year. A reference to the hospital records to find

THE ORIENTAL MILK PRODUCTS

find the amount spent for diets, about 18 years back, for the number of in-patients then, and the amount spent for the enormous number of in-patients now, will disclose the bare fact.

We are now given to understand that arrangements are likely to be made for the supply, through the Registrar of Co-operative Societies in Mysore, who is undertaking the concern on behalf of the Kamadhenu Co-operative Society, Bangalore City. We are given to understand that the said society is just now intending to enter on the field and have not even started with the preliminary arrangements for a huge supply to the three institutions. Our firm being in the working order, with a substantial capital, a portion of the entire requirements, however meagre it may be for the present, may be entrusted to us at 11 3/4 pints per rupee quoted in our tender, or, at the rate that may be awarded for the said Kamadhenu society. We undertake to keep on with the supply inspite of all varying conditions of the demands due to the natural unstable hospital requirements of the day. We will deposit as security any amount that may be fixed by the concerned authorities.

For which act of kindness, we shall ever pray.

We beg to remain,

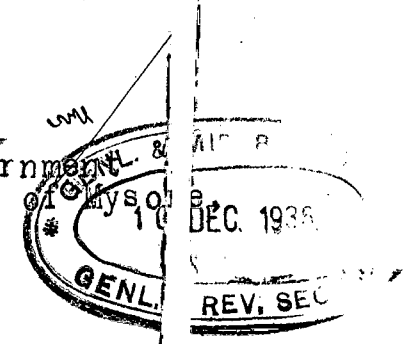
THE ORIENTAL MILK PRODUCTS
(REGD. PARTNERSHIP FIRM)

2, Lal-Bagh Road,
BANGALORE CITY
Dated 10- 12 193 6.



To

The General Secretary to the Government
of His Highness the Maharaja of Mysore,
Bangalore.

Most Respected Sir,

In response to Tender Notice published in the Mysore Gazette, during September last, for the supply of pure Cows' Milk freshly drawn on the spot to the Victoria, Vani Vilas and Minto Ophthalmic Hospitals, Bangalore, we have submitted our tender to the Secretary of the above three Hospitals on the 9th November 1936.

With regard to our credentials, we beg to state that we are a registered Partnership Firm of 4 capitalists and professionals, dealing in milk, milk products and fodder, with a substantial capital. We own at present 22 cows whose yielding capacity is about 70 seers in the morning and about 60 seers in the evening. We have vast experience in the Business. On account of the growing demand for milk and duly encouraged by our customers, we have, besides the above of our own, engaged, by paying advances, other milkmen to lead their cows to our business premises; and by this, the aggregate yield, per day, would come up to 300 seers or thereabouts.

We are given to understand that the Government have no intention of dealing with us, on the presumption that we are exploiting middlemen, attaching thereto considerable unfounded implications due to malicious misrepresentations

misrepresentations of interested people to gain their own end, some of whom, we have come to know now, are the actual tenderers for the said milk-supply. To erase out the said impression from the mind of the authorities, we beg to bring the following to your kind notice:-

(a). The usual practice of the so-called middleman, after securing Government contract, is to advance money to people - owning cows, fixing a reasonable rate for the supply, thus ensuring regular supplies throughout.

(b). At no time during the course of the supply, eversince the so-called middlemen have taken up the contract of milk supply, the concerned authorities have reported to Government against them re: irregularities affecting the welfare of the patients, nor have the Government received any report from constituent milk-suppliers as to the said middlemen having fleeced them to starvation by - extracting abnormal rates.

OFFICE OF THE
SECOND MEMBER OF COUNCIL.
9 DEC. 1936
NO. M.710.

N. Madhava Rau, Esq., B.A., B.L.,

Member of Council,

Bangalore.

Petition addressed to Second Member of Council. Subd to Genl Secretary.

Honoured & Respected Sir,

We beg to state that we hear that the Kamadhenu Co-operative Society of the City New Market have been entrusted with the Milk supply of Victoria, Minto Ophthalmic and Maternity Hospitals; if it is so, the following facts should be considered side by side with this question, duly weighed:

(a). The Directors and shareholders are not at all experts in the supply of milk: they are not professionaliste.

(b). In the city limits, there are more than 3 to 4 thousand people who have taken this Milk Supply trade to live upon. The said society cannot even claim about 4 per cent. of them as their members of shareholders.

(c). This society has hardly any business knack of the regular supply of milk: this society is quite unlike Malleswaram Co-operative Society, City Co-operative Society, Basavangudi Co-operative Society: it is not functioning properly and for only namesake it is in existence for the so-called benefit of the professionals, which in fact is not.

(f). They hage no experience in milk trade and they do not therefore know even the rudimentary principles thereof.

(g). They are ignorant of this trade, which fact is quite glaring, as they are quite unaware of the relationship of a pint and a standard seer of Government; as such, by accepting eleven and a half pints per rupee fixed by the authorities, who, it is regretted to find, are labouring under a great misconception of the prevailing market rate and the capacity of seer and pint.

(h). The authorities of the Kamadhenu Society have not shown to outside public that they are equipped with all sorts of ways and means for the disposal of the surplus quantity of milk that may happen to remain after issuing the requirements to the three institutions, as the cows that may be lead for such supplies may yield more than what may be exactly required for the day. It is surely a mishap to the Society.

(i)

(i). The daily requirements of the hospitals are not at all stable. They vary as per admissions and discharges. At times, the yield may fall too much short of the actual requirements. Rules do not permit of outside milk being brought to make up the shortage. If the society really maintains any cows and sufficient establishment for their maintenance and disposal of surplus milk etc., and ways and means as to how to meet the extra contingencies,&c., none of which unfortunately they have, everything would have been quite O.K. But, it is not the case.

(j). It is but very natural that epidemics break out among cows during summer and other seasons and cows die and yielding goes, in that case, for much less than the actual requirements. In case of such contingency, it is a matter for the authorities to ascertain how this Kamadhenu society will be able to cope up with the supply.

(k). In a presidency Hospital outside Mysore State, it is learnt that it so happened that, about 7 years back, ~~that~~ there was utter failure of milk supply undertaken by a milk supply union owing to the strike of their constituents who were utterly dissatisfied with the rates. In the present case also, there is such a likelihood, for, 5 seers fixed ~~by~~ at the Meeting held at Apex Bank would work out to 11 pints (one seer is equivalent to 44 ozs; a pint means 20 Ozs.) only, out of which half or three-fourths pint should be deducted to meet all incidental expenses towards staff &c., and there would hardly remain 10 1/4 pints, ~~and~~ to be quoted for supply; but, the Senior Surgeon has fixed 11 1/2 pints per rupee and the society, in this case, has ~~to extract~~ extract 3/4ths pint towards expenses to staff &c., resulting in the Milk Men's supply at 12 1/4th pint per rupee to the Kamadhenu society. Is it ever possible for the milkmen to keep on with the supply during all seasons of the year at this rate? No, not at all!

In conclusion, we beg to state that it is highly desirable that the Government, in the interests of the three important institutions, should consider all these safeguards in this important article of diet by way of additional hands being kept in reserve, before entrusting the supply to such society as Kamadhenu society--incompetent as it is--for reasons set forth above. For this act of kindness, we shall ever be highly grateful.

We beg to remain,
Honoured and respected Sir,
Your most obedient s e r v a n t s ,

5th December 1936.

OFFICE OF THE FIRST MEMBER OF COUNCIL
DEC 1936
No. 3714

Most Honoured Sir,

We beg to state that the City Milk Supply Co. of Narasimharaja Road, who are the current year's Milk Supply Contractors to the three principal Hospitals of the City, have been worrying their present milk suppliers to them to enter into an agreement to supply at 15 lbs. per rupee for drawn milk during 1937, instead of at 14 lbs., their current year's rate. They seem to have quoted, for 1937, 9 pints per rupee for pure drawn-milk on the spot and 10 pints for pasteurised milk, which they would send from their premises. They have been saying that the Government might perhaps accept their tender for pasteurised milk to be introduced to these 3 hospitals here, as they have done so at Mysore City. We beg to state in this connection, although it is not within our province to question the equity of accepting the rate of the City Milk Supply Co., for pasteurised milk who it seems have quoted the said rate with some questionable motives perhaps, that when the published tender notice was not for the same, yet, it is presumed, that it is permissible for public people like ourselves to lay bare the situation in the interests of suffering humanity for whom the said milk is meant, that it may work bad with the suffering patients and that such pasteurised milk might be an adulterated one, as, for the reason that, the said Company seem to have quoted, in their tender for 1937, 9 pints for pure cows' milk drawn on the spot and 10 pts. for pasteurised milk: if it is genuine pure cows' milk that is being pasteurised for supply, the quoted rate should naturally be less than that of pure cows' milk

which

which is raw and drawn on the spot, for, incidental expenses of pasteurisation have to be added to the cost of pure cows' milk, which would necessarily increase the rate of pasteurised milk rather than decrease the same; and this decrease, we fear, may be possibly due to only adulterated milk being only pasteurised and not pure freshly-drawn-cows'-milk.

The above facts may kindly be taken into consideration and only the individual cow-owners be encouraged to give supplies of freshly-drawn-cows'-milk only and not pasteurised (perhaps adulterated) milk.

If the authorities are bent upon only pasteurised milk being supply being taken, the next year, a separate tender notice be kindly issued, so that the Imperial Dairy Farm and others who have got facilities or own apparatus for same may compete with one another and quote most favourable rates to Government, which ultimately ensures purity of supply.

For which act of kindness, we shall ever be highly grateful.

We beg to remain,
Most Honoured Sir,
Your most obedient servants,

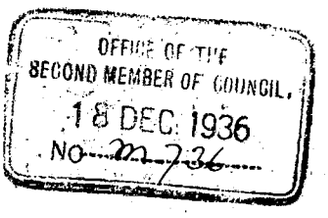
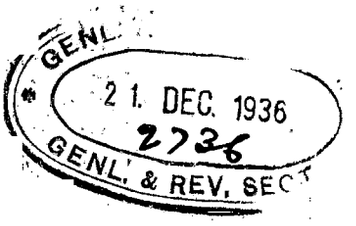
Subject .....





The Private Secretary,
To The Dewan Saheb,
(Camp) M Y S O R E.

Dear Sir,

Further to my interview with the Dewan Saheb and the kind assurance given by him I beg to lay before him the following facts for further consideration just at the time when the final decesions are to be made.

The present situation is as the Government is aware that Tenders received are in more on account of competition and wanting to spoil the Trade than of any real ability to supply the Hospital with the Quality Product as required by the Hospital and the Government.

We might also point out that none of the Tenderers have any investment at stake when we have as you are aware invested heavily and maintain at heavy cost Plant and Machinery for the Service of the Public and Govefnment Institutions. You are also aware that recently various estimates and schemes have been called for to tackle this important problem and we are sure the Dewan Saheb must have by now come to know the immense difficulties we have been facing and overcomming all these uears to aive this Quality and Service.

We are sure the Dewan Saheb who has always evinced an interest in our development and under whose encouragement we have been

going forward with a scheme of expansion by further investment will give us the continued patronage when we have given our all to the cause of the improvement of milk supply in the State.

Due to the peculiar conditions of this trade we found that the whole direction and management had to be entirely done by one individual for the growth of the Insitution and facilitate the line of action chalked out may not be disturbed before the looked reasults are obtained.

When the Government themselves are going out to investigate the possibility of opening milk supply institutions by organising the supplies from Villages, pasteurising before delivery we who have been poineers in the field are being threatened every year by unhealthy competition.

Our General aim has been to develop the Institution to such an extent that it will be self supporting and house the same in a Building of its own and if required hand it over to the control of the Government whose resources are such that they may take up further expansion and put in the same on better foundation. But we beg to point out if the Government should withdraw its patronage at this infant stage all the hopes we had will be shattered and will be a blow to any kind of private enterprise to the milk industry.

May we therefore pray for the continued patronage of the Government and see that an institution of our kind which has done its best is not deprived of its patronage becasue it has tried to do its best for supply of pure product.

We are enclosing herewith a few of the Testimonials we have received from various Medical Officers of the Institutions the supply of which has been entrusted to us.

Thanking you very much for placing the above before the Dewan Saheb for his consideration and favourable order.

We beg to remain,

Yours faithfully,

It gives me great pleasure to certify that the Pastuerised Milk supplied by the City Milk Supply, Mysore, to this Sanatorium since 1932 has been uniformly good. Bacteriological examinations made frequently testify to the high degree of pastuerisation effected. The patients are satisfied with the milk and the staff has had no trouble by way of watching the boiling or distribution of milk to the patients as the supply of the milk in sealed can has proved very effective in doing away with any mis-handling or adulteration.

Princess Krishnajammanni
Tuberculosis
Sanatorium, Mysore.

Dated 15th December 1936.

B. JAYARAM, M.B. Etc.,
Medical Officer.

It gives me great pleasure to certify that the Pastuerised Milk supplied by the City Milk Supply, Mysore, to this Sanatorium since 1932 has been uniformly good. Bacteriological examinations made frequently testify to the high degree of pastuerisation effected. The patients are satisfied with the milk and the staff has had no trouble by way of watching the boiling or distribution of milk to the patients as the supply of the milk in sealed can has proved very effective in doing away with any mis-handling or adulteration.

S/d. B. Jayaram
MEDICAL OFFICER.

OORGUM,
Kolar Gold Field,
S. India.

30th April 1929.

Mr. M. V. Krishnaswamy has been Manager of the Ooregum Dairy for about three years. Mr. Krishnaswamy has proved himself to be fully qualified to run all branches of the Dairy Business and has a very extensive knowledge of both the practical and theoretical sides of dairying. He is courteous to customers and kind to his subordinates, both important factors in dairying on a commercial scale. I wish him all the success he deserves in the future and I give him this on the eve of my retirement from India.
